The Development and Impact of the Information Professional Community Virtual Workplace

The worldwide explosion in telecommunications, technical information systems, sophisticated decision aids, complex weapons systems technology and the potential ability of adversaries to exploit these emerging technologies demands Information Professionals fully prepared to meet the technological challenges of a Network Centric Warfare environment.

The Navy requires a career path that ensures the development, education and retention of technically skilled intellectual capital.

The Development and Impact of the Information Professional Community Virtual Workplace

The Information Professional's Mission and Purpose

We are the Navy's community of Technically Elite Information Warriors with expertise in information, command and control, and space systems. We own the Naval Network, the foundation of information dominance and successful execution of Naval, joint, allied and coalition operations. We plan, acquire, operate, maintain and secure the Naval Network and the systems that support Navy's operational and business processes to ensure they are reliable, available, survivable, and secure. We evaluate and integrate leading edge technologies, innovative concepts, and essential information elements to ensure a war fighting advantage.

The Development and Impact of the Information Professional Community Virtual Workplace

IP Community Virtual Workplace (IPCVW)

The workplace is the collaborative environment by which we interact and operate. In this forum we learn, inform and educate, share experiences, and provide the tools necessary to solve information-related challenges. IP members continuously shape the features of the virtual environment, both individually and for the community.

The Development and Impact of the Information Professional Community Virtual Workplace

Info on Site Purpose...

To create a web presence for the IP community.

To inform members of each other, their community, and their role in 'Big Navy'.

To offer venues for learning, discussion, and support.

To create a community of practice.

The Development and Impact of the Information Professional Community Virtual Workplace

Info on Site Design/Development...

To capture best practices in website development.

To maximize use of commercially-available tools.

To engage community members in design of use interface and functions.

To support ongoing Navy Enterprise Portal efforts.

The Development and Impact of the Information Professional Community Virtual Workplace

Info on Site Management/Maintenance...

- To embed site within a Navy entity. (SPAWAR).

- To respond quickly to community needs.

- To follow efficient and effective programming
and support protocols.

- To ensure a stable database for the site.

The Development and Impact of the Information Professional Community Virtual Workplace

Info on Site Deployment/Utilization...

To capture members of the IP community.

To encourage their participation through discussion forums, informational briefings from IP leadership, active mentoring, and personal achievements.

To offer continuous support to community members for learning, career management, and work.

The Development and Impact of the Information Professional Community Virtual Workplace

Info on Site Features/Statistics...

- To gather data on member utilization of the site.

- To mine information from discussion boards.

- To streamline communication throughout the community.

The Development and Impact of the Information Professional Community Virtual Workplace

Info on Site Successes...

To learn and apply lessons regarding site acceptance.

To improve site functions.

To enhance site features.

To respond to community member needs and wants.

The Development and Impact of the Information Professional Community Virtual Workplace

Info on Plans for Improvement/Integration...

- To add more 'push' features to the site leading to a IPCVW 'tailored' to the individual member.

- To offer more interactive features, e.g., webinars, community news and information alerts, live chats.

- To sustain the premier Navy Officer community of practice online.

Someone today mentioned the position of "Knowledge Manager" on an aircraft carrier. What is that? Is there a job description somewhere? Does every carrier have one? Does he/she do the same thing on every carrier?

Robby

Robbie,
COMENTBATGRU (COMCRUDESGRU 12) has approval for a test of a new officer on their staff as a Knowledge Manager. I believe that one of the PAC Battle Groups is doing a similar test. I haven't heard of any as ship's company. Having come from there as the BG Commo, I helped to fill that role part time. We were very involved in the installation and efficient use of Collaboration at Sea (CAS) while I was there. With that comes a lot of issues related to knowledge management. What information is important, what are the rules for sharing information, who owns and updates the information, etc. As our C4I systems mature and are fielded across the battle group, the next level is effective employment of the knowledge available to us. I think it's an exciting move.

CDR Nancy Norton
